

SOCIAL NEEDS

It is certain that some groups of our population find themselves in unfavorable conditions due to lack of social and economic resources.

Consequently, it is important to enhance the willingness to learn of the students in order to have a better future.

The APS project aims to promote the motivation of the students in their studies.

GOALS

- To promote the students' curiosity and interest on studying.
- To make an effort to be understood by the students.
- To identify the key points of my project that I want the students to learn.
- To learn to edit a wikipedia's page.

CONTENTS

The concepts that I want the students to learn are the ones related to the breeding way of laying hens, the nutritional and culinary role of eggs and advice for their safe consumption.

FIRST SESSION

- The breeding ways of laying hens.
- Eating eggs is healthy.
- Debunking the cholesterol myth.

SECOND SESSION

- The egg has many functionalities.
- To show that there is innovation in the food field.

THIRD SESSION

- To advice on good hygiene practices in the kitchen.
- Salmonella as a major pathogen in egg.

FINAL THOUGHTS

The fact of having done my final degree project as an ApS has kept me motivated all along the course. For me, it has been a great learning in two main ways, in an academic one but also in a personal one. It has enriched me .

This experience has made me realize how much I like scientific communication and that I want to devote myself to it.

WHY WIKIPEDIA?

As my project was supposed to have an informative nature, I came up with the idea of sharing it too in the wikipedia's egg page in aim of letting more people access to the knowledge I learnt during all this journey.
